## Street Fire Distributor, PN 8362

**NEW  
PRODUCT!**

Introducing the Street Fire value-line brand of MSD Ignition. Street Fire components will offer a quality designed alternative to the bottom bargain parts that are springing up all over. We're so assured with the quality of our new Street Fire HEI Distributor that we provide a one year warranty with it!

MSD understands the importance of a centrifugal advance in a distributor so our engineers made sure that the Street Fire received an advance assembly with coated weights and welded weight pins (not just pressed in like other models). Another area that you cannot afford to scrimp on is with a distributor gear so we install the same heavy duty gear we've always used.

Inside, the ignition module and coil work together to produce a stout spark to light the fuel mixture for great performance. The high voltage is transferred through a new rotor to the brass terminals of the distributor cap and out to the plugs.

- **All new components, including the coil, spec'd by MSD engineers.**
- **The only value priced HEI with a full one year warranty .**
- **Welded weight pins and heavy duty construction.**
- **Adjustable vacuum advance helps tune it to each engine.**
