## **Camshaft Sensor Extension Harness (for early LS-2 engines using MSD 6LS) PN 88861**

### **Parts Included:**

1 - PN 88861 Extension Harness

This Harness will extend the wiring of the PN 6010 Harness to the camshaft sensor located on the front timing cover on LS-2 engines. This harness is designed for early LS-2 based engines that use a 24-tooth crankshaft sensor.

Use the PN 88861 to extend the OEM Cam Sensor Adapter (Figure 1) towards the PN 6010 Harness.
